

How did the size of the IPO market change over time?	Did any industry perform particularly good or bad?	Should we buy the big IPOs or the smaller ones?	Who do you go to for the deals?	Summary and IPO Screening System
--	--	---	---------------------------------	----------------------------------

Pricing Date

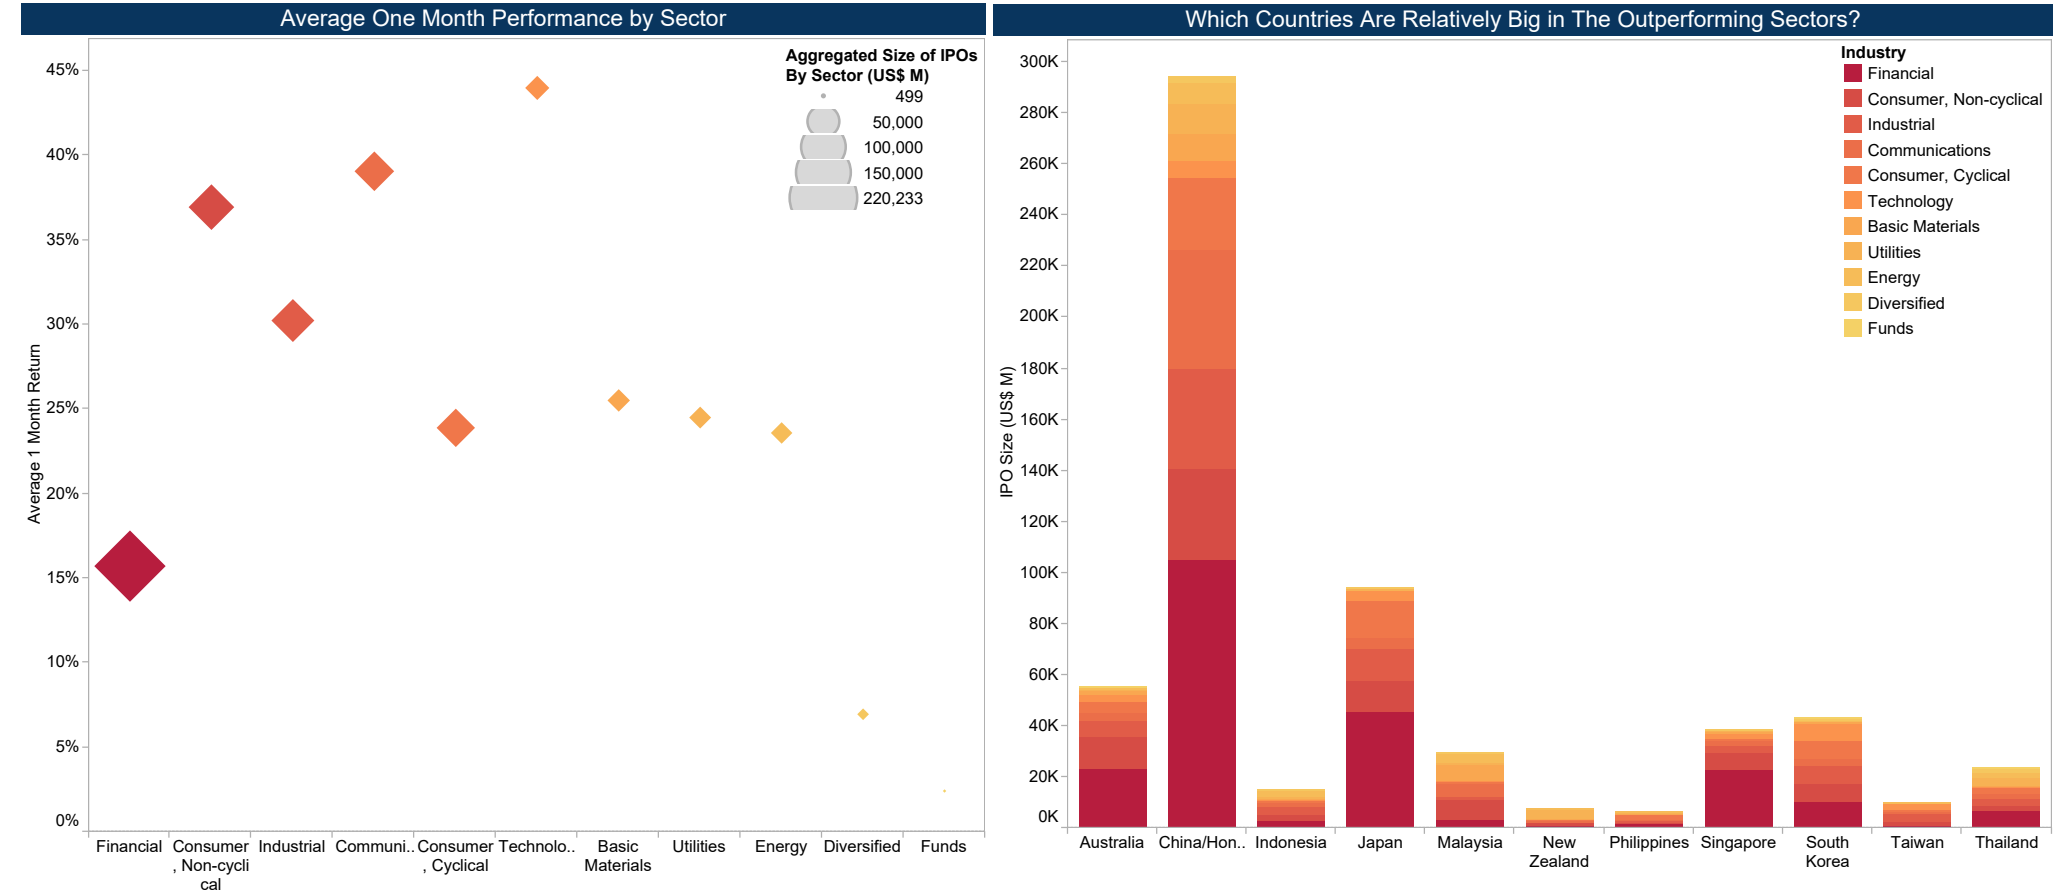

1/2/2007 to 4/19/2018

Asia IPO market has gone through two full cycles in the past decade. In the peak year, it raised about US\$ 2.3 trillions from the public. Shaded Area is the 95% confidence interval of the forecast.

By changing the date range, it is noticed that Communication, Consumer Staple, and Industrial were among the most active IPO sectors in the past decade, only after the Financial industry.

How did the size of the IPO market change over time?	Did any industry perform particularly good or bad?	Should we buy the big IPOs or the smaller ones?	Who do you go to for the deals?	Summary and IPO Screening System
